DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 6-10 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wieczorek et al (#5,524,958) in view of McCall et al (#4,865,368).

Wieczorek et al show a holding device (70) comprising a carriage (16) guidable as a drawer to be displaceable back and forth, a guide means for guiding the carriage during its displacement between the positions, and a holder having an insertion opening. The holder can be raised on the carriage when it is pulled out. However, Wieczorek et al do not show a gravity locking device. McCall et al teach a slide latch gravity lock (20) having means to prevent the lock from opening when the apparatus (2) is in its vertical position (see Figures 1-5). It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate McCall et al's

slide latch gravity lock to the holding device of Wieczorek's invention in order to lock the carriage in place with the holding device, when both the carriage and holding device are pivoted from a horizontal position to a vertical position.

With claims 6-10,12, and 14, the guide means is formed so that a path of raising the holder is oriented upwardly in relation to the carriage.

Response to Arguments

Applicant's arguments, see Amendment, filed July 11, 2005, with respect to the rejection of claim 13 under Wieczorek et al (#5,524,958) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Wieczorek et al (#5,524,958) and of McCall et al (#4,865,368). Accordingly, this Office action is considered to be Non-final.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamamoto, Bergin, Vairinen, Chung, and Moret are cited as showing similar types of holding device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Vu whose telephone number is 571-272-6862. The examiner can normally be reached on M-F from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter M. Cuomo can be reached on 571-272-6856. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
